DETAILED ACTION

Information Disclosure Statement

1. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Specification

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Objections

3. Claims 1, 3, and 19 are objected to because of the following informalities:

(a) in claim 1, "quantum dots layer" on line 14 should probably be --quantum dot layer--;

(b) in claim 3, "quantum dots layer" on line 25 should probably be --quantum dot layer--;

(c) in claim 19, "quantum dot layer" on line 13 should probably be --light absorption layers--;

(d) in claim 19, "quantum dot layer" on line 14 should probably be --light absorption layers--; and

(e) in claim 19, "quantum dots layer" on line 15 should probably be --light absorption layers--.

Appropriate correction is required.

4. Claim 6 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 5 recites the limitation "wherein the distribution of impurities in the at least one impurity-containing layer take a shape of a delta function". Claim 6 recites the limitation "wherein the at least one impurity-containing layer have a uniform distribution of the impurities therethrough". However, claim 6 have been amended to depend from claim 5 instead of independent claim 3. Therefore, claim 6 fails to further limit the subject matter of a previous claim since a delta function impurity distribution is not a uniform impurity distribution.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 1-19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter

which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicant has not pointed out where the amended claims are supported, nor does there appear to be a written description of the claim limitation "wherein the electron-flow through the quantum dot layer is blocked by the quantum dots formed in the quantum dots layer" in the application as filed.

Response to Arguments

7. Applicant's arguments with respect to amended claims have been considered but are moot in view of the new ground(s) of rejection.

Applicant should note that filing amended claims which correct the 35 U.S.C. 112 problems discussed above may result in rejections of the amended claims under 35 U.S.C. 102 and 35 U.S.C. 103.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 2884

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
